Dayn, the newest hard white spring wheat developed by Washington State University, delivers an average of 12 bushels more per acre in irrigated production areas compared to the next best comparison variety. This outstanding increase has been confirmed by extensive testing in irrigated systems by the University of Idaho and Washington State University over the past four years.

Dayn’s test weight, grain protein content, straw strength, and maturity are consistently very good. The end-use quality of Dayn is desirable for both domestic and export markets. Excellent stripe rust resistance, proven under severe epidemics throughout the Northwest, protects Dayn’s pack-leading yield potential.

**AGRONOMICS**
- **Yield Potential**: Excellent
- **Test Weight**: Very Good
- **Protein**: Good
- **Maturity**: Medium Early
- **Height**: Medium
- **Quality**: Desirable
- **Straw Strength**: Excellent

**DISEASE RESISTANCE**
- **Stripe Rust**: Excellent
- **Hessian Fly**: Susceptible
### 3-Year Average Yield (bu/acre), Test Weight (lbs/bu), and Protein (%) from 2011–2013

**AVAILABILITY:** Foundation seed of Dayn is maintained by the Washington State Crop Improvement Association for sale in Washington and neighboring counties of Idaho and Oregon. Outside Washington, seed dealers can license and obtain Dayn from AgriPro, a division of Syngenta Cereals working in partnership with WSU. For seed inquiries please call WSCIA at (509)334-0461; for Syngenta/AgriPro Cereals contact Ed Driskill at (208)301-0459 or Tony Severa at (208)301-8149. U.S. Plant Variety Protection granted.

Support for the development of this variety was provided by Washington State University, the USDA Agricultural Research Service, and the Washington Grain Commission. ¹For more information please visit smallgrains.wsu.edu.
